ELEMENTS

Yale

The world's favorite lock

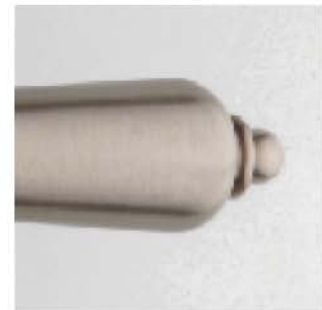

An ASSA ABLOY Group brand

ASSA ABLOY

Finely crafted **locks** in 3 **distinctive finishes.**

Nothing says quality with the eloquence of Design Elements™ from Yale®. Sustaining the legacy of high standards set forth by Linus Yale in the mid-19th century, Design Elements™ from Yale® artfully designed and finely crafted locksets remain unmatched in the industry today. Made of solid brass and crafted with fine detail, Yale Design Elements sets the industry standard for exceptional beauty teamed with high performance.

Style and finish options make decorating statements with individual flair. These exceptional locksets add a sense of incomparable value to every door when you select the perfect finish. Choose from Polished Brass with a PVD coating to ensure the sheen stays just as bright as the day it is first installed. Add the richness of Oil Rubbed Bronze to any decor, reminiscent of the traditional lustre incorporated by architects in stately civic buildings and manor homes – now available for the home. Select Satin Nickel for a contemporary, yet sophisticated warmth for both modern and traditional looks. It's a true multi-purpose finish, perfect for any application.

Secure **yourself** and your **belongings.**

Homeowners will appreciate the character and personality Yale Design Elements adds to any home's décor... Available in 3 beautiful finishes, this distinctive collection combines beauty, feel and impeccable engineering to give your home a distinct measure of quality. Years of product development insure you'll feel a constant sense of security, knowing you've chosen locksets that will provide smooth, flawless operation and protection for yourself, your family, and your belongings.

Confidence in quality and performance allows Yale Design Elements to offer a limited lifetime finish and mechanical warranty on its entire product line.

Knobsets & Leversets

Unique Design Elements™ from Yale®

Lifetime Limited Warranty for Original Owner - finish & mechanical operation
