EZ # 035529

MULTI-FUNCTION

Multi Function products are made up of a bag of components that are able to produce many different functions (up to 6 in a single bitted wafer bag). This allows you to carry few locks in inventory while still having complete stock on hand. Complete installation instructions are printed on the back of the bag. Typically a multi function cam lock would include 2 cam stops, wonder washer for both wood and metal - no need for double 'D' punch, splines for key rotation, and of course the base lock.

Key Blanks (Boxes of 50)
