

SLIDE GUARD USA

SLIDE GUARD is a two part lock for use on glass, Plexiglas, laminated surfaces or wood. It prevents the opening of sliding doors or windows. The mounting plate bonds permanently to the surface. The lock ratchets onto the mounting plate and is removable with either a key or thumb turn. There are 4 models.

Applications:

- PATIO DOORS - Can be used on inside or outside sliders
- SLIDING & DOUBLE HUNG WINDOWS
- MEDICINE CABINETS
- PICKUP TRUCK REAR WINDOWS
- MOTOR HOME / RV WINDOWS
- DISPLAY CASES
- POCKET DOORS
- CREDENZAS

Features:

- Installs in minutes.
- No tools required.
- No drilling.
- Proven reliability.
- Attractive packaging.
- Available KA or KD.
- Ventilation position.
- Bonds to glass, metal, laminates (Formica®), Plexiglas, wood (SLG016).
